

A screenshot of an IDE interface. The top toolbar shows tabs for PROBLEMS (44), OUTPUT, DEBUG CONSOLE, TERMINAL, PORTS, and COMMENTS. The TERMINAL tab is active, displaying a command prompt session. The command executed is `/usr/bin/env /Library/Java/JavaVirtualMachines/jdk-23.jdk/Contents/Home/bin/java -XX:+ShowCodeDetailsInExceptionMessage -cp /Users/aliammar/Desktop/pharmacy/target/classes com.pharmacy.management.PharmacyApp`. The output shows an error: `Error: Unable to initialize main class com.pharmacy.management.PharmacyApp` followed by the cause: `Caused by: java.lang.NoClassDefFoundError: Stage`. The left sidebar contains icons for a user profile, OUTLINE, TIMELINE, JAVA PROJECTS, and MAVEN (with a blue circle containing the number 1).
